

National Biosecurity Week 2026 – Content for Social Media Posts

Post 1 (Theme: Shared responsibility)

As a proud signatory of the Biosecurity Business Pledge Australia, we're committed to playing our part in protecting Australia's agriculture, environment, economy and way of life.

This National Biosecurity Week, we are reminded that biosecurity is everyone's responsibility. By staying vigilant, following good biosecurity practices and reporting anything unusual, we are helping to keep Australia strong and resilient.

Post 2 (Theme: Partnerships)

Strong biosecurity depends on strong partnerships.

As a business that has taken the Biosecurity Business Pledge Australia, we're proud to work alongside government and the community to strengthen Australia's biosecurity system.

This National Biosecurity Week, we're celebrating the partnerships that help protect our plants, animals, food supply, environment and trade opportunities for future generations.

Post 3 (Theme: Small actions make a difference)

National Biosecurity Week is this week, and it's a great reminder that small actions can have a big impact!

Having recently taken the Biosecurity Business Pledge Australia, we are committed to promoting awareness, encouraging good biosecurity practices and helping prevent the spread of pests, diseases and invasive species in Australia.

Together, we can help protect our industries, natural environments and amazing Aussie communities.

Post 4 (Theme: Love your patch!)

Australia's food, environment, jobs and industries are worth protecting.

That's why we've joined the Biosecurity Business Pledge Australia and are supporting National Biosecurity Week this week.

A strong biosecurity system benefits us all, but it only works when businesses, governments and communities work together. This week, take a moment to learn more about biosecurity and how you can help protect what makes Australia special by visiting bioweek.org.au
